

# ESZTER DÉNES

**Nagy Lajos Grammar School of the Cistercian Order, Pécs**

**Address:** Széchenyi tér 11., H-7621 Pécs, Hungary

## TEACHING CAREER IN BRIEF

In 2002, I started teaching at the first agricultural secondary school in Szentlőrinc, Hungary, in parallel with my university studies. In 2005, I graduated as a biology and environmental science teacher at the University of Pécs. During the first ten years of my teaching career, I focused on the development of pupils and talent management in parallel. Both are a source of getting my students to love biology and develop a scientific approach. I am constantly motivated by the success of my students, which encourages them to continue learning in science and methodology.

I wrote my teacher's exam in 2012, based on the intermediate level written exam and the measurement of everyday science knowledge. I wrote my teacher's exam in 2012, based on the biology intermediate written exam and the measurement of everyday science knowledge.

Between 2005 and 2016, I coordinated the Road to Science project, which created a unique science laboratory in vocational education and training, which provided the basis for professional training. I have been 'Pro Talento' awarded for my work in talent management.

Since 2006, I have been continuously involved in administering the advanced Matura examination. In 2019, I joined to the Nagy Lajos Grammar School of the Cistercian Order, where I was introduced to a whole new segment of talent management. The professional cooperation within the school and the direct knowledge of the goals of the National Academy of Science and Humanities have given my talent management work a different aspect. I consider it important to help my students achieve their goals, for which continuous professional development and network-based learning are essential.

## SUCCESSFUL STUDENTS

### Orsolya Kaló

biologist UP, Faculty of Sciences

- Kitaibel Pál Competition 2013, 7<sup>th</sup> place

### Petra Grünwald

head of laboratory, Hungarian University of Agricultural and Life Sciences, Campus Kaposvár

- Kitaibel Pál Competition 2009, 3<sup>rd</sup> place

### Szabolcs Hernádi

biologist University of Cardiff

- National Secondary School Competition 2009, 21<sup>st</sup> place

### Eszter Molnár

high School teacher

- Kitaibel Pál Competition 2007, 2<sup>nd</sup> place

### Dániel Vátyi

surgeon doctor, Grünstadt

- Curie Environmental Competition 2007, 3<sup>rd</sup> place

### Dávid Czár

agricultural engineer

- Kitaibel Pál Competition 2006, 6<sup>th</sup> place
