Semmelweis University  
Faculty of Medicine  
Department of Internal Medicine and Oncology  
Department of Endocrinology

**Address:** Korányi Sándor u. 2/a., H-1083 Budapest, Hungary

## RESEARCH AREA

Studies on endocrine tumors, especially adrenal and neuroendocrine tumors. In the focus, non-coding RNAs (especially microRNAs), their pathogenic roles and utility as biomarkers are examined. Both tissue and biofluid samples are used. As biomarkers, markers of malignancy and prognosis are searched for. The clinical relevance of these studies is underlined by the diagnostic difficulties related to the adrenal and neuroendocrine tumors both in histology and clinical diagnostics.

## TECHNIQUES AVAILABLE IN THE LAB

- Isolation of nucleic acids (RNA, DNA)
- Real-time PCR techniques
- Next generation sequencings
- Studies on protein expression (Western-blot)
- Tissue culture
- Database search
- Article writing
