

MIKLÓS POÓR

University of Pécs
Medical School
Department of Laboratory Medicine

Address: Ifjúság út 13., H-7624 Pécs, Hungary

RESEARCH AREA

I. Interaction of mycotoxins with biomolecules and with potential mycotoxin binders: Toxicokinetic studies, investigation of combinative effects, and experiments with potential mycotoxin binders (for toxin extraction, decontamination, and/or detoxification purposes). II. Interaction of natural polyphenols and their metabolites with drugs: Certain dietary supplements contain extremely high doses of polyphenols; in this project, the interaction of these polyphenols and their metabolites are examined with important proteins from the pharmacokinetic point of view (e.g., serum albumin, biotransformation enzymes, drug transporters).

TECHNIQUES AVAILABLE IN THE LAB

UV-Vis and fluorescence spectroscopy, investigation of protein-ligand interactions, in vitro enzyme assays, HPLC, pleate reader, cell experiments.

SELECTED PUBLICATIONS

Poór, M., Faisal, Z., Zand, A., Bencsik, T., Lemli, B., Kunsági-Máté, S., Szente, L. (2018) Removal of zearalenone and zearalenols from aqueous solutions using insoluble beta-cyclodextrin bead polymer. *Toxins* **10:** 216.
