

# ANNA POSZTOBÁNYI

**Gödöllő Reformed Secondary School**

**Address: 9 Szabadság Square, H-2100 Gödöllő, Hungary**

## TEACHING CAREER IN BRIEF

---

I graduated from Eötvös Loránd University as a teacher of Chemistry and Geography. After obtaining my degree, I began working at Reformed Lyceum of Gödöllő, where I had previously completed my secondary school studies and graduated from high school myself.

In my teaching practice, I strive to ensure that every student acquires solid foundational knowledge during lessons, which they can later build upon in talent development programs or when choosing a related career path. In my pedagogical work, I place special emphasis on developing systems thinking and highlighting logical connections. It is important to me that my students are able to think critically using the knowledge they acquire. In addition, I aim to make my lessons engaging and illustrative, often enriched with experiments in order to maintain students' motivation.
