

## MÁRTON TILESCH

National Academy of Scientist Education, 1<sup>st</sup> year

University of Szeged  
Faculty of Pharmacy, 1<sup>st</sup> year

### YEAR OF BIRTH

---

2004

### FORMER SZENT-GYÖRGYI PUPIL

---

no

### SZENT-GYÖRGYI MENTOR

---

István Szatmári

### JUNIOR MENTOR

---

Bálint Lőrinczi

### SPECIALIZATION

---

pharmaceutical chemistry

### SECONDARY SCHOOL

---

Táncsics Mihály High School, Kaposvár

### NAME OF TEACHER

---

dr. Endréné Miklós

### LANGUAGES

---

English/intermediate

### IMPORTANCE, AIMS AND POSSIBLE OUTCOME OF RESEARCH

---

The MMP13 enzyme is associated with several diseases, such as spondyloepimetaphyseal dysplasia, for example. The inhibitory effect of several quinoline-based compounds on MMP13 is known, but currently there is no molecule available that could be effectively used as a drug. The goal of our research group is to synthesize as many potentially such compounds as possible, which can be used in later stages of drug development, and hopefully among them will be the cure for the aforementioned and some other diseases.

### AMBITIONS AND CAREER GOALS

---

I've always wanted to try my hand at scientific research, and the Szent-Györgyi programme is an excellent opportunity to do so. I can gain a body of knowledge and technical skills that will be of great help to me in my work, whether in academia or in the clinic.

### HONORS AND PRIZES
