

KRISZTINA DR. VERESNÉ KIS

Dobó István High School, Eger

Address: Széchenyi u. 19., H-3300 Eger, Hungary

TEACHING CAREER IN BRIEF

In 1992, I graduated from the biology-geography department of Kossuth Lajos University in Debrecen. I first started teaching in Miskolc at Ilona High School in Zrín, then in 1997 I moved to István Dobó High School in Eger, where I am still teaching. In 1998, I graduated from Eszterházy Károly College with a degree in environmental protection, in 2010, I obtained a mentor teacher degree, and in 2015, I obtained a talent development teacher qualification. In 2006, I took a professional exam in the field of examination chairman, expert and manager, and then in 2016 in the field of talent development teacher. In my school, I have been the leader of the biology-chemistry-geography work community since 2006. I currently coordinated the area of talent management, internal self-evaluation, eco school, and previously the finance school. In 2013, I received the Bonis Bona award and received several city and school talent management awards. I consider it a matter of my heart to embrace talented students and help them choose a career. To this end, I wrote and implemented quite a few successful applications, which helped to improve the equipment of my subjects, to implement programs and study trips that helped to develop their talents. Since 2008, I have been running the Natural Science Talent Care Workshop, and for years I have been organizing a biology competition for 8th graders with my colleagues. Carrying out the duties of the exam chairperson and the tasks of the high school graduation helps to prepare my students as well as possible for the graduation. Since 2011, I have helped quite a few students become teachers as a mentor and supervisor. Since 2016, as a master teacher, I have been performing expert tasks in the field of teacher certification and teaching supervision. In 2018-2019, on behalf of the OFI, I proofread digital teaching materials and participated in the preparation of professional materials for the laboratory of the EKE Practical School. I try to educate my students to love my subjects, to be open to learning about the ever-changing world and the latest research areas. Their success is shown by their national and international competition results.

PUBLICATIONS

In the framework of TÁMOP-3.1.3-10/2-2010-0010 „Education of natural science content with modern infrastructure, in network cooperation in the Northern Hungary region”, auxiliary material entitled „Project work water tests” was prepared in 2013.

NTP-TÚP-13-0009 with the support of application ID number

SUCCESSFUL STUDENTS

PhD Dr. Boglárka Hurján
medical-laboratory diagnostic
analytical, clinical researcher

Zsófia Estilla Tóth, PhD
molecular bionics
Cognitive Neuroscience and
Institute of Psychology
• 2008 Kitaibel Pál 14th place
• 2009 Árokszállásy 14th place
• 2010 Biology OKTV 2nd round

Dr. Eszter Koch
pulmonologist resident
• 2009 Biology OKTV 2nd round
• 2008 Árokszállásy 17th place
• 2009 Árokszállásy 8th place
• 2010 Biology OKTV 2nd round

Alexandra Gecse
DE-MÉK food engineer
Viresol Kft. laboratory manager
• 2015 Biology OKTV 2nd round
• 2015 Árokszállásy 19th place
