

## GERGŐ BITAY

National Scientists Academy, 3<sup>rd</sup> year

University of Szeged,  
Albert Szent-Györgyi Medical School, 3<sup>rd</sup> year

#### YEAR OF BIRTH:

1999

#### FORMER SZENT-GYÖRGYI PUPIL:

yes

#### SZENT-GYÖRGYI MENTOR:

Norbert Nagy

#### SPECIALIZATION:

electrophysiology,  
farmacology

#### SECONDARY SCHOOL:

Radnóti Miklós  
Experimental Grammar  
School, Szeged

#### NAME OF TEACHER:

Béla Gál

#### LANGUAGES:

English/advanced

#### IMPORTANCE, AIMS AND POSSIBLE OUTCOME OF RESEARCH

Our research group specialises in researching the electrophysiological and pharmacological properties of the heart. We mainly focus on the spontaneous activity of the heart,  $\text{Ca}^{2+}$  - homeostasis; sudden cardiac arrest related research on athletic heart syndrome models. In our laboratory we conduct research on rabbit and dog models, both on tissue samples (conventional microelectrode technique) and on individual cells (patch-clamp). My main research involves the spontaneous activity of the sinus node:  $\text{Ca}^{2+}$  - homeostasis, sodium-calcium exchanger, small-conductance calcium-activated potassium (SK) channels. SK channels have a significant role in neurons, and due to the fact that they create a direct connection between the intracellular calcium handling and the repolarisation of the cell membrane, their role in the cardiac tissue could also be important. However, there is no consensus in the literature on the extent of their contribution to cardiac repolarisation. Because both the  $\text{Ca}^{2+}$  - homeostasis and the repolarisation are related to arrhythmias, SK channels could potentially have a major role pathophysiologically and pharmacologically.

#### AMBITIONS AND CAREER GOALS

My ambition is to become a successful doctor and to continue with research. Furthermore, my goals are to earn a PhD and other degrees. The amount of knowledge given to us by the programme, the publications and the scientific conferences all contribute to achieve these goals.

#### HONORS AND PRIZES

2019 - XXXIV. OTDK, Medical and Health Section, Theoretical Medicine -  
Electrophysiology: Special Award

2018 - SZTE ÁOK TDK: Best presentation in the secondary-school section

2017/2018 - Biology OKTV 14<sup>th</sup> place

2017 - SZTE Szent-Györgyi Competition 3<sup>rd</sup> place
